General services include examination, testing, cleaning and lubrication (when and where necessary), tightening and adjustment of all equipment. Actual repairs needing ordered parts not in stock, and extra time to complete will be reported to an authorized facility contact for approval. The work will be completed as soon as possible upon receiving approval and/or required parts. To decrease downtime and return trip charges, a client may order common parts that frequently need replacement. These parts would be discounted 10% and be stored onsite.

Should you decide to use us, we will give response calls within 24 hours and strive towards a 72-hour repair period.
